Heavy-Duty Mobile Powered Workstation with
PowerSwap Nucleus Lithium Power System

www.laubner.com/mobile-arbeitsplätze

The PC Series Workstation offers many of the same standard features as the NB Series, but is designed to hold and power a variety of additional equipment and provides generous space to hold inventory.

The PC Series consists of 762 mm and 1220 mm deep workstations that are designed for ease of mobility. With high performance 150 mm rubber casters and narrow profile, they can be moved and positioned with minimal effort throughout a facility.

The top shelf is ergonomically adjustable and can be set at 3 different heights to suit the operator and the task being performed. The optional middle shelf is also adjustable in height. The bottom shelf holds the power package and is accessible as needed. It can also be used for additional storage space.

System Consists of:

- a) PC Series workstation with battery docking station
- b) 1 to 4 lithium battery packs
- c) Battery charging station

New and improved casters provide 50% improvement in rolling force.

A number of optional accessories are available and can be easily integrated in seconds for a highly versatile workstation.

PC Series Workstation shown is a 762 mm deep unit with optional accessories.

Slide-Out Printer Tray

Fully adjustable shelves with slotted mast

Optional 38 mm lip
